Nate Lander

Equipment: Workstation computer

Set up:

1. Open up the “Builds” folder on the computer
2. Select “Nate Lander” (the one with the pixelated app image)

Controls/Navigation:

- Keys A & D to move left and right
- Keys W & S to move up and down
- Controls can be inverted by selecting the option on the left of the screen
- Mouse to select “start” and other features on the screen

Gameplay:

1. Select “start” to start the game
2. A spaceship floats down; the player needs to use the keys to land the spaceship on the darker colored bricks with numbers floating above them
3. There is a green bar on the right-hand side of the screen with yellow in the middle and a small black bar to show their speed with the bar. The player needs to be in the yellow to land their spaceship safely.
4. There is fuel at the bottom of the screen. If the player runs out of fuel, the spaceship will fall/crash
