

Wildland 205

Equipment: Quest 3 or 2 and a cable linked to a workstation computer

Set up:

1. Turn on the headset and create a new boundary. The playspace should be standing and allow for full range of arm motion.
2. Connect headset to the computer through the cable and open the Meta Quest application to complete the quest link (directions for quest link located in Technical Walkthroughs)
3. Put the headset on and open the App Library. Scroll for Wildland 205 (should be labelled as GGJ Spaceship) and select it

Controls/Navigation: Space button on keyboard to enter

Gameplay:

1. Landing screen displays title and credits. Enter the experience.
2. Player will likely load in facing the direction of a spaceship (easier to see if they look up).
The player can then look around Wildland via turning their head.
