

How to use Smart Masks in Substance Painter

Open your substance project

You can find the **smart masks** in the **assets folder**. It's a **“rectangle with a hole” icon** next to smart materials.

To show how to use the smart masks I will use this **table** as an **example**

This is how it looks **before** any smart mask applied

First **select** your **smart mask** drag and **drop** it in the **layers tab**

I choose **moss** for the table

The **mask** is already **applied** once dropped in the **layers tab**

If you click on "**Mask Builder - Legacy**" in the layers tab you can adjust the **settings of the mask**

PROPERTIES - GENERATOR

GENERATOR

Generator

> Attributes

Parameters

Seed Random

Level 0.65

Contrast 0.4

Invert False

Use Triplanar False

Triplanar Blending Contrast 0.5

Grunge 0.4

> Grunge

AO 1

> AO

Curvature 1

> Curvature

Before

After

To **add textures**, click on the **white ball** next to mask.

Scroll **down** in the **properties tab**. Now you can **add** your textures in the **material section**.

Try **not** to choose materials that have **spaces** in between.

For example,

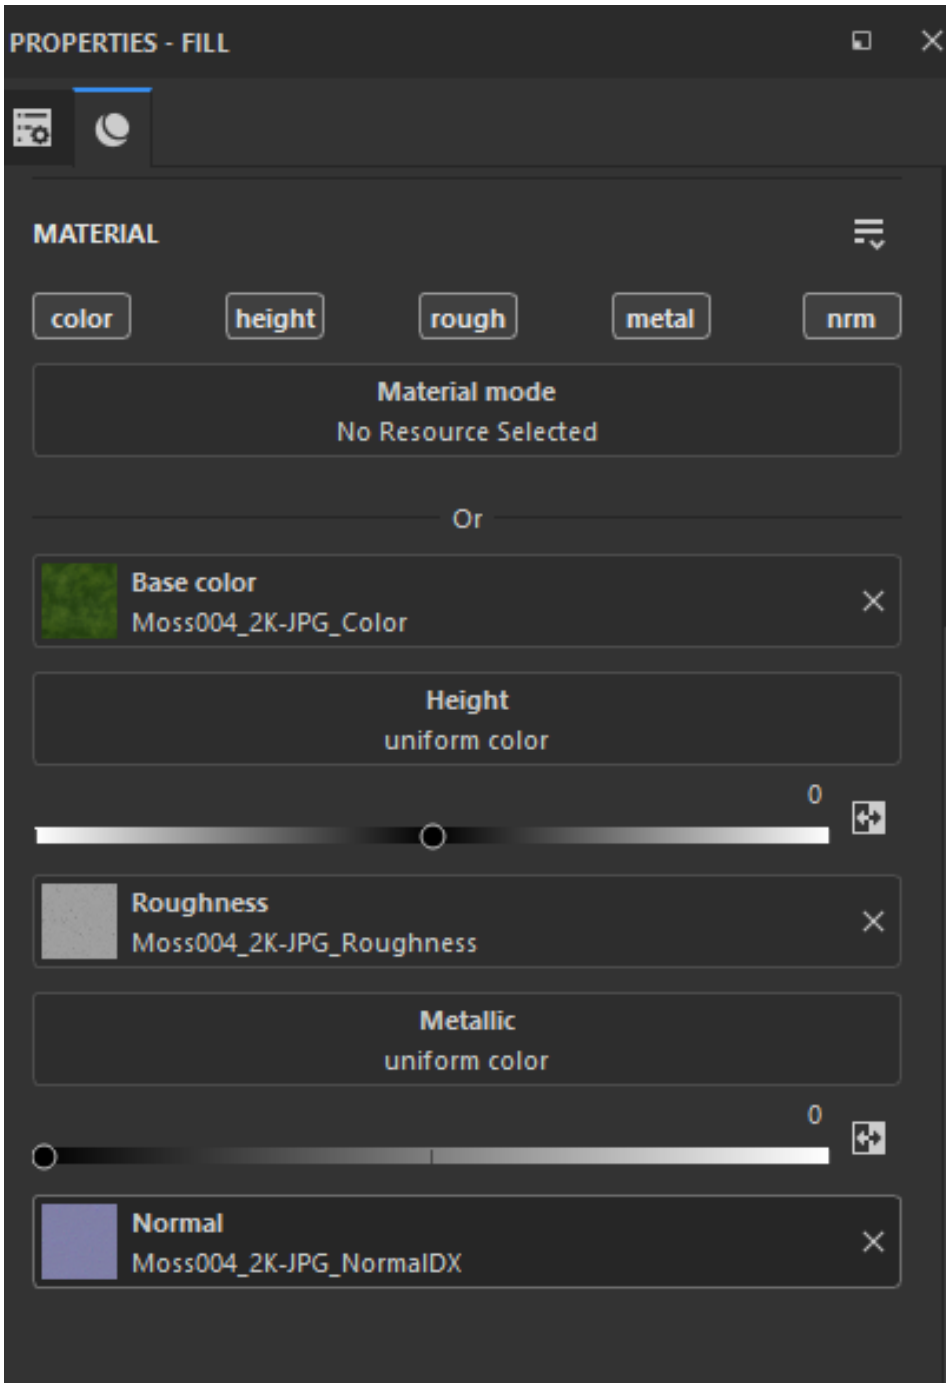

Choose the **first one** instead of the second one **for better visuals**

Or if you're going for **metal rust**.

Go for the **first one** for better visuals.

Now add your textures in the **properties** window.

After adding your textures, it should look like **this**.

The End.
