

Creating Custom Cutouts

1. Find and import your shape
2. With the shape selected, click “edit” at the right side of the top bar
3. On the left menu that opened, click “Ai Cutout”
4. Click “Manual Cutout” in the top left corner
5. Using the magic wand and eraser, remove the background of the image and any inside parts of the shape that would be unnecessary and click confirm
6. Click “Trace” in the same menu as the “Ai Cutout” option
7. Leave the settings as is and click “Save”
8. A new object will be created that is the outline of the object you chose, this object has the “Score” and the “Cut” options in addition to the usual “Engrave” option
